

Quality Architectural Spandrel

Extraordinary Color for Architectural Glass

THE CERAMIC ADVANTAGE

Widely used since ancient times, Ceramic color possess unrivaled durability and color fastness.

Ceramic Paints are based entirely on high-performance Ceramic materials.

YOU GAIN THE BENEFITS

- Ceramic enamels are actually fused onto the surface of the glass itself, they will not delaminate, blister or crack.
- Ceramic enamels are hard, as hard as the glass itself. They won't scratch or mar during fabrication or installation.
- Ultimate chemical resistance means that Ceramic enamels will not fade, stain, or discolor upon contact with glazing compounds, sealants or gasketing materials.
- Fired on Ceramic enamels are non-toxic. Every color is "green".
