

Cleaning LUXCLEAR™ Protect Glass

When used in shower and bath enclosures, keep LUXCLEAR Protect glass looking better between regular cleanings by using a soft rubber squeegee to remove water after each use. This will also make regular cleaning easier.

Hand cleaning of LUXCLEAR Protect glass may be accomplished using the following recommendations:

- ◆ Thoroughly wet the surface of the glass with plain water to remove surface contaminants.
- ◆ Use a soft cloth or a sponge (Magic Eraser® is also permitted) and a commercially available glass cleaner to clean the glass. After cleaning, rinse thoroughly with water and dry. A soft rubber squeegee or clean cloths may be used to dry the glass. The more frequently you clean the glass the easier the cleaning process will be each time.
- ◆ Commercial cleaners such as Clorox® Glass Cleaner, Fantastik® Cleaner, Lysol® Bathroom Cleaner, Mr. Clean® Bathroom Cleaner, Invisible Glass Cleaner®, Sprayway® Ammonia Free Glass Cleaner, Tilex Shower Cleaner®, Windex® Ammonia Free Glass Cleaner, Windex All Purpose Cleaner with Vinegar, Soft Scrub® and Scrubbing Bubbles® Shower Cleaner are acceptable. Additionally, a mixture of 50% water and 50% white vinegar may be used.
- ◆ **Never** use abrasive cleaners or chemicals on the coated side of the glass. Examples of these cleaners or materials include, but are not limited to: Ajax®, Comet®, CRL Sparkle, CLR Calcium, Lime and Rust Remover®, Lime-A-Way® Hard Water Spot Remover, Bon-Ami, Bar Keepers Friend, Soft Scrub, cerium oxide, polishing compound and any product containing hydrofluoric or phosphoric acid.
- ◆ **Never** use any type of metal scraping device, razor blades, Brillo® Pads, steel wool, abrasive Scotch-Brite® pads or other abrasive pads or devices on the LUXCLEAR Protect surface.
